- Heroin and crushed Tylenol PM® caplets that form a light tan powder.
- Contains between 2 and 8 percent Heroin.
- Considered a “starter” from of heroin, designed to get new users hooked on heroin.
- Its use is spreading from the Texas area to the Southeast.

PRICES
1 HIT (1/10TH GRAM) - \$2.00

This drug is specifically marketed to school age children. The most common users are Hispanic teens.

Cheese is usually snorted using a straw or tube.

It is nothing new to adulterate heroin with other substances. This particular mixture gives the effect of mixing cocaine and heroin.

Cheese is made using pure heroin that is smuggled in from the Southern Border of the U.S. It can be packaged in capsules or folded wax paper (bindles).

The Dallas Independent School District Police Department reported over 75 incidents involving cheese in less than 1 year. As of May 1, 2007 DISD PD has arrested 113 children for possessing cheese.
